DSA and Problem Solving

- Solved **100+ DSA problems** across arrays, strings, recursion, linked lists, stacks, queues, trees, graphs, dynamic programming, and SQL.
- Participated in coding contests and hackathons, including 12-Hour Internal Hackathon 4.0.

Programming and OOP

- Languages:** C++ proficient, C good, Python decent, JavaScript decent, PHP decent.
- Applied object-oriented programming concepts such as classes, objects, encapsulation, modularity, and reusable components in academic and full-stack projects.
- Built backend modules, REST APIs, authentication flows, reusable React components, and database-connected features using JavaScript, Next.js, React.js, Tailwind CSS, Neon Database, Prisma, MySQL, Postman.

Computer Science Fundamentals

- Coursework:** Object-Oriented Programming, Data Structures, Analysis of Algorithms, Artificial Intelligence.
- Core Areas:** DSA, OOP, DBMS, Operating Systems, Computer Networks, and software engineering basics.

Projects and Practical Development

- Automated Data Quality & Data Observability Platform** [GitHub](#)
 - Developed a centralized platform to automate data quality validation and continuously monitor dataset health across multiple data sources.
 - Implemented configurable validation rules to detect missing, duplicate, invalid, and inconsistent records, improving data reliability and integrity.
 - Built data observability features including freshness monitoring, schema drift detection, anomaly detection, data quality scoring, and an interactive dashboard with alerts and historical trends.
 - Tech Stack:** React.js, FastAPI, Python, Pandas, NumPy, PostgreSQL, Scikit-learn, Recharts, REST API, Git/GitHub
- CampusConnect – College Club & Activity Management Platform** [GitHub](#) | [Live Demo](#)
 - Developed a full-stack college campus management platform with role-based access for Admin, Faculty, and Student users, providing centralized management of academic and extracurricular activities.
 - Implemented 10+ functional modules including student/faculty authentication, club management, event management, membership registration, announcements, notifications, certificates, faculty/student approval, and attendance management.
 - Developed and integrated 30+ RESTful APIs using Next.js API Routes, Prisma, and PostgreSQL for authentication, users, clubs, events, memberships, notifications, certificates, announcements, and attendance.
 - Implemented secure authentication using JWT, HTTP-only cookies, bcrypt password hashing, and role-based authorization, along with email-based password recovery for students and faculty.
 - Tech Stack:** Next.js, React.js, TypeScript, Tailwind CSS, Prisma ORM, PostgreSQL, Node.js, REST APIs, JWT, bcrypt, Nodemailer, Git, GitHub

Internship and Experience

Infosys Springboard – Virtual Internship 7.0 **Virtual**
Selected for AI Internship *2026*

- Selected for the Infosys Springboard Virtual AI Internship, demonstrating proficiency and interest in Artificial Intelligence and emerging technologies.
- Participating in structured AI-focused training and practical learning activities covering Artificial Intelligence, Machine Learning, data analysis, and real-world AI applications.

Codec Technologies Pvt. Ltd. **Remote**
MERN Stack Developer *Aug 2025 - Sept 2025*

- Developed CampusConnect, a full-stack campus management platform designed to streamline student, faculty, club, event, membership, notification, and administrative workflows.
- Implemented role-based authentication and authorization, allowing students, faculty/club coordinators, and administrators to access and manage features according to their respective roles.
- Used React.js, Node.js, Express.js, Neon Database, JavaScript, RESTful APIs, Tailwind CSS, Git, and GitHub throughout the development lifecycle.

Engineering Practices

- Used Git and GitHub for version control, repository management, commits, and project collaboration.
- Tested REST APIs using Postman and debugged frontend/backend issues during full-stack development.
- Deployed projects using Vercel, Render and followed basic documentation, modular code structure, and reusable component practices.
- Worked with VS Code, npm, Neon Database, Prisma and package-based project workflows.

Technology Fit

- **Full-Stack Development:** React.js, Next.js, Node.js, Express.js, JavaScript, HTML, CSS, Tailwind CSS, REST APIs.
- **Database & Backend:** PostgreSQL, Prisma ORM, SQL, JWT Authentication, bcrypt, Role-Based Access Control.
- **Real-Time & Application Features:** Socket.IO, Notifications, Attendance Management, Event Management, Club Management, Dashboard Analytics.
- **Developer Tools:** Git, GitHub, VS Code, Neon Database, Postman, npm, Vercel.

Academics

COER University <i>Bachelor of Technology - Computer Science and Engineering; CGPA: 8.63</i>	Roorkee, Uttarakhand <i>July 2023 - June 2027</i>
K S College <i>PCMB; Percentage: 61.8%</i>	Ara, Bhojpur Bihar <i>April 2020 - March 2022</i>
B. D. Public School <i>Matriculation; Percentage: 63.2%</i>	Ara, Bhojpur Bihar <i>April 2019 - March 2020</i>

Achievements and Certifications

• Oracle Data Platform Certified Foundations Associate	<i>Sept 2025</i>
• Certificate of Participation – Internal Hackathon 4.0, COER University, Roorkee	<i>Mar 2025</i>
• Certificate of Achievement – Computing Fest by IITians	<i>Mar 2024</i>
